BLACK MOUNTAIN
SOFTWARE

MOBILE ASSET TRACKING

MOBILE ASSET TRACKING is a powerful sub-module of our **ASSET MANAGER** application and provides a fast and easy way to establish location and existence of assets or your valuable non-capitalized asset inventory with:

Barcode inventory scanning using a laptop and a barcode scanner

Inventory scanning is portable and easy to use without buying a more expensive handheld terminal/ wireless reader

Use Code 128 barcode high-density labeling to allow for use on even very small items

Audible "Item Scanned" confirmation feature to ensure accuracy so moving to next item can be done with confidence

System allows manual entry of tag number if barcode tag or barcode scanner is not available

Simple, easy add-on module to your existing **ASSET MANAGER** software

Alerts you to asset location changes during inventory file import and allows for updating the location in Asset Manager with a single click

REPORTS

Scanned Items not in Asset Manager Report

Tags where Location, Building, Room Changed
